

# Lab: Apply more filters in SQL

## Introduction

In this lab, you'll apply more filters to SQL queries to retrieve information from a database. You'll use common operators in SQL to filter by specific dates and times. You'll be using the MariaDB shell to run your SQL queries.

## What you'll do

You have multiple tasks in this lab:

- Filter for login attempts made after a certain date
- Filter for login attempts made in a certain date range
- Filter for login attempts made at a certain time
- Filter for login attempts by ID
