

# Lab: Find files with Linux commands

## Introduction

In this lab, you'll learn how to navigate a Linux file structure, locate files, and read file contents. You'll use Linux commands in the Bash shell to complete these steps.

## What you'll do

You have multiple tasks in this lab:

- Find your current working directory and display its contents
- Navigate to a directory and list subdirectories
- Display the contents of a file
- Display the first 10 lines of a file
