Lab: Examine input and output in the shell

Introduction

In this lab, you'll use the echo command to examine how input is received and how output is returned in the shell. You'll also use other Linux commands in the Bash shell to explore more about input and output and other basic functions of the shell.

What you'll do

You have multiple tasks in this lab:

- Generate output in the shell the echo command
- Perform basic calculations the expr command
- Clear the shell window the clear command
- Explore the commands further
