Scenario

In this scenario, you have to determine which employee devices must be updated. You also need to investigate user login activity to explore if any unusual activity has occurred.

The information you need is located in the `machines` and `login_attempts` tables in the `organization` database.

Here's how you'll do this task: **First**, you'll obtain information on the employee devices that must be updated. **Next**, you'll examine the login attempts for unusual activity. **Finally**, you'll use the `ORDER BY` keyword to sort the data returned by your SQL queries.
