Scenario

In this scenario, you have to locate and analyze the information of certain files located in the `/home/analyst` directory.

Here's how you'll do this: **First**, you'll get the information of the current working directory you're in and display the contents of the directory. **Second**, you'll navigate to the `reports` directory and list the subdirectories it contains. **Third**, you'll navigate to the `users` subdirectory and display the contents of the `Q1_added_users.txt` file. **Finally**, you'll navigate to the `logs` directory and display the first 10 lines of a file it contains.

To complete these tasks, you'll need to use commands that you've previously learned in this course. Well, it's time to practice what you've learned. Let's do this!
